

AL 44 new

This profile is designed to join Alubond sheets in structures. It provides support and prevents sagging.

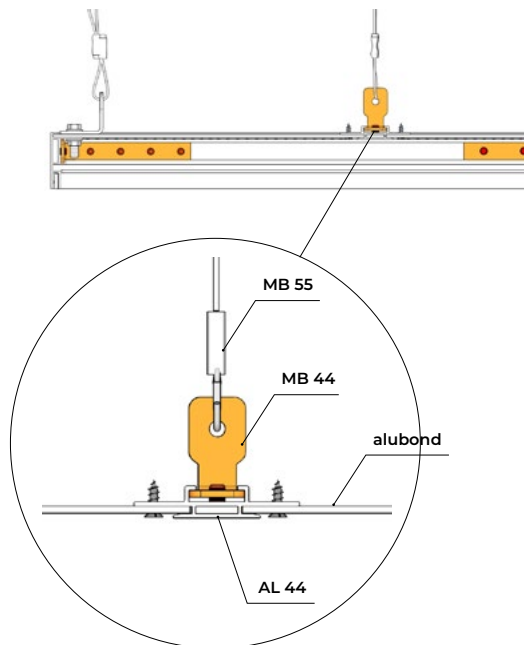

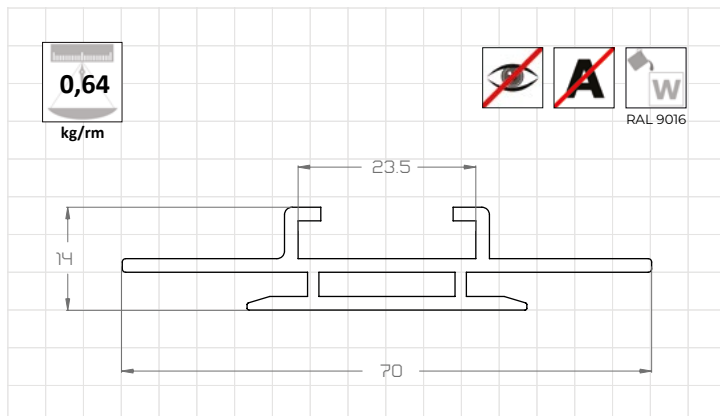

FEATURES

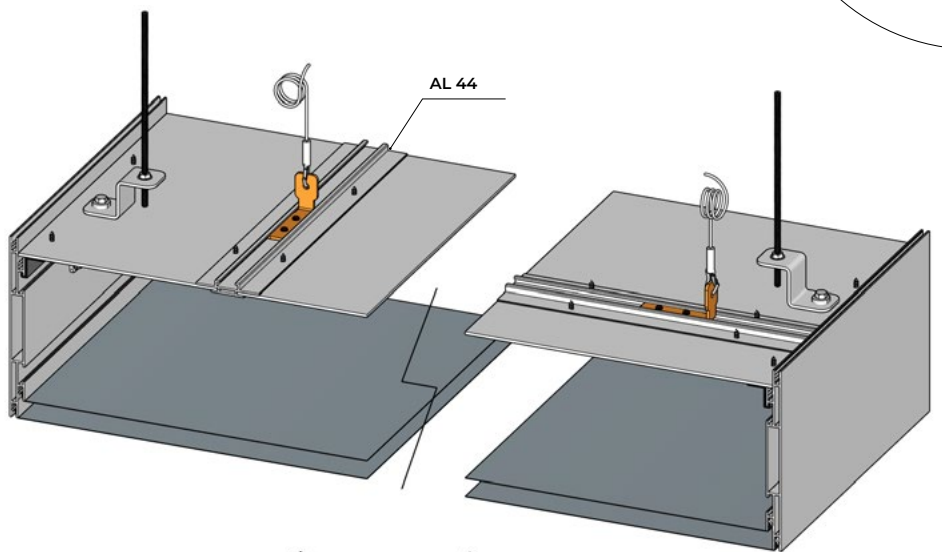

- lightweight profile
- features 3 mm deep grooves for fixing aluminium composite panels
- special flanges on both sides, ensuring a secure connection between alubond sheets using screws

PROFILE REAL-SIZE DIMENSIONS

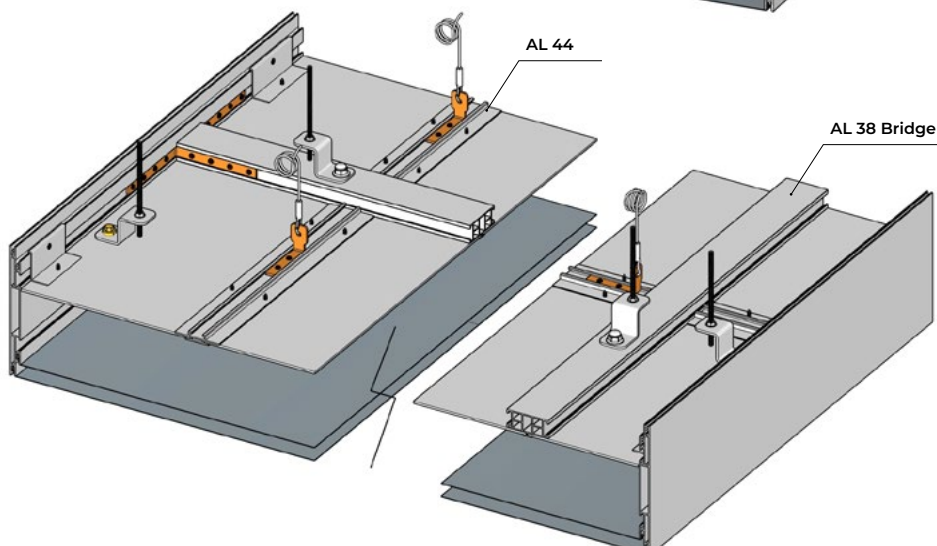

WAYS TO USE

Variant 1

For connection of the alubond sheets and avoid sagging.

Variant 2

The same usage but with combination of AL38 Bridge, when structure needs to be reinforced.
